ESTHETIC MARMORÉAL

CLEANING AND MAINTENANCE GUIDE

• • •

Tile is considered to be easy to care for and requires very little maintenance when compared to other surface decor options. By taking a few preventative measures and following simple routine cleaning tips, you can easily keep your tile look pristine.

- Routine Care For Porcelain And Ceramic Tiles
- Vacuum And Sweep Regularly To Remove Dust And Debris.
- Clean Your Floors Weekly With A Neutral Ph Cleaner That Does Not Contain Ammonia, Acid, Or Bleach.
- Just Use Water And A Mild Detergent Or A Spray And Wipe-type Cleaner On A Soft Cloth Or Non-abrasive Scourer, Then Rinse With Water And Dry With A Soft Cloth Or Paper Towel.
- Glazed Ceramic Backsplashes In Bathrooms Can Be Cleaned With Multi-purpose Bathroom Cleaner As Long As The Cleaner Is Also Suitable For Grout.

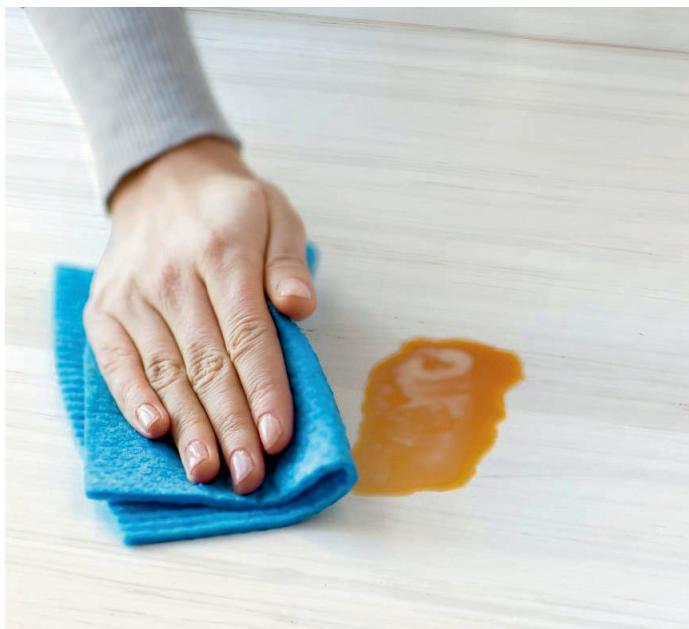

MAKE NEATNESS YOUR FORTE

- Wipe Up Wet Spills To Prevent Limescale Forming.
- Routine Care For Porcelain And Ceramic Tiles
- Check Each Cleaning Product First On An Inconspicuous Area To Ensure That It Doesn't Damage The Surface.

STUBBORN STAINS

GET RID OF STUBBORNESS WITH EASE

- For stubborn stains, those which have been there for a while due to their composition on the surface over a long span of time cannot be removed with daily cleaning, we recommend following the table below that outlines various possible types of stains and the most suitable cleaning products to eliminate them.
- Gently rub the area with an accredited cleaner (Recommended Cleaning Products below) and a soft fabric or paper towel.
- Clean a larger area than the stain itself using circular motions.
- Rinse with water and dry with a soft fabric or paper towel.
- Repeat the process if you still see the stain.

DEEP CLEANING OF LIOLI PORCELAIN TILES

While taking care of stubborn stains, we recommend using specific/similar kind of solutions as indicated below. Every stain is easier to get rid of when it is still fresh. It is suggested to examine the recommended solutions on a small area before applying to the entire surface of the porcelain tiles. Concentration/Dilution of the solution depends on the tile surface.

TYPE OF STAINS	SOLUTION	SOLUTION – SOLUTION PROVIDER
----------------	----------	------------------------------
